EDUCATION

PES Modern College of Engineering

Bachelor of Engineering in Artificial Intelligence and Data Science

Pune, India

Aug 2023 – May 2027

– CGPA: **9.03 / 10.0** (up to Semester 5)

S.N.B.P International School, Rahatni

Higher Secondary Certificate (CBSE)

Pune, India

May 2023

– 12th Grade: 78% | MHT-CET Percentile: 92.56

TECHNICAL SKILLS

Languages: Python, JavaScript, SQL, C++

Frontend: React.js, HTML5, CSS3, Material UI, Responsive Design

Backend & Databases: Node.js, Express.js, Flask, REST APIs, PostgreSQL, MongoDB, MySQL

Data & ML: Pandas, NumPy, Scikit-learn, EDA, Feature Engineering, Data Cleaning, LLMs, Groq API

Tools & Platforms: Git, GitHub, Postman, Jupyter Notebook, Streamlit, Vercel

EXPERIENCE

Software Development Intern

Jan 2026 – Mar 2026

KH Infinite Possibilities Pvt. Ltd.

Remote

- Built and maintained a web-based email template builder using React, TypeScript, and PostgreSQL; migrated all Bootstrap components to Material UI, improving UI consistency across the application.
- Implemented a complete password reset flow using Google SMTP App Password configuration and backend validation, ensuring secure and reliable user authentication.
- Designed and optimized PostgreSQL queries and REST API endpoints for storing, retrieving, and managing email templates with full CRUD support.
- Collaborated across a distributed team using Git and GitHub for version control, feature branching, and code reviews.

PROJECTS

AI Resume Critique Tool | Python, LLMs, Groq API, Streamlit

Nov 2025

- Engineered an automated resume analysis pipeline using **Large Language Models** to evaluate content quality, keyword density, and ATS compatibility.
- Integrated the **Groq API** for high-speed LLM inference, achieving average response latency under 2 seconds per analysis.
- Built an interactive **Streamlit** dashboard supporting PDF upload, real-time feedback display, and section-level scoring.
- github.com/nishtha911/ai-resume-critique

TrackSpace – Smart Study Companion | Python, Flask, MySQL, JavaScript

2025

- Developed a full-stack study management web app with subject tracking, exam scheduling, and **priority ranking** based on deadlines and difficulty scores.
- Designed a **MySQL relational schema** to manage subjects, units, topics, and exam records; implemented automated deadline alerting with color-coded urgency indicators.
- Built a responsive dark-themed UI using **HTML5, CSS3, and JavaScript** with real-time progress tracking and dynamic table updates.
- github.com/nishtha911/smart_study_companion | trackspace-chi.vercel.app

My Rasoi – Recipe Discovery Engine | React.js, Python, Pandas

Aug 2025

- Built a recipe discovery platform that filters recipes based on user-selected ingredients using a **Kaggle dataset** cleaned and processed with **Python and Pandas**.

- Implemented ingredient-based filtering logic and optimized data lookup to improve search relevance across 1,000+ recipes.
- Developed a fully responsive **React** frontend with mobile-first design principles.
